

# EcoSmart Systems

*Smart for you, smart for the planet!*

As part of Better Water inc's Green Initiative, we are dedicated to advancing energy efficiency and conservation for both ourselves and our customers. The new EcoSmart Systems, from BWI, provide an economically viable and eco-friendly approach to water treatment for dialysis.

## The EcoSmart System Solution

- Lower operational costs
- As much as a 50% water savings
- Average 50% energy savings on pretreatment and RO unit
- Manufactured and shipped from the U.S. - This means lower shipping costs and less fuel use
- System designed specifically for your facility - No oversized units means no waste
- FDA 510K system

Better Water, Inc is committed to reducing its own environmental footprint. BWI brochures and manuals are available at [www.betterwater.com](http://www.betterwater.com), where customers can download and read electronic versions. All quotes are now issued electronically, unless otherwise requested by the customer. In addition, BWI works hand in hand with dialysis providers, contractors, and project managers to ensure fewer trips and quick installation times.

*Energy Savings*
