Pre-Treatment Assemblies

Pre-Treatment Rack

Standard Features

- Variable Frequency Drives (VFD)
- Blend valve
- Thermometer
- City Boost pump
- Rugged Steel powder coated frame
- Copper tubing
- Full set of gauges

Pre-Treatment Assembly

Sized accordingly

Better Water LLC has the solution to all your pre-treatment needs. The Pre-Treatment assemblies accommodate blend valve, blend valve by-pass, boost Pumps (single or three phase), multi-cartridge housing, 2 auxiliary ports, copper piping, and all the necessary controls and safety features. Each assembly has the same features and safety considerations of Better Water's standard water system, and can be pre-fabricated on a single rugged powder coated frame or assembled on site as a wall mount. This allows for unparalleled flexibility. The pre-treatment systems come assembled or ready for installation, greatly decreasing the time needed for the usual labor intensive installation of pre-treatment piping and filters. Custom configurations are available.
