

BETTER WATER LLC

Water Treatment For Dialysis

Water Treatment for Dialysis

High quality, reliable water systems play a critical role in providing superior patient care. Better Water LLC are experts in the field of water systems for dialysis. We understand that water systems for dialysis must be superior, in order to supply the high quality water that dialysis demands. From the system design, to installation, and after install support, Better Water LLC provides the solutions and service you need. Our strong commitment to patient safety, customer satisfaction, regulation compliance, and technology innovation, are the driving forces behind the Better Water LLC product line.

Solutions

Better Water LLC offers turn key solutions to the dialysis provider. Using our Decision Making Process (DMP), BW LLC reviews the feed water analysis, along with the clinical demands for RO water. We then design a water system specifically for your facility. Pretreatment, filtration, reverse osmosis, and ultra-filtration all combine to provide you with a high quality, reliable system that will produce the pure water that a dialysis patient requires. All of our systems carry a 510k certificate from the FDA and are designed to meet or exceed AAMI RD: 62 on RO quality water for dialysis. Each system is individually tested prior to shipping. Equipment includes enclosed UL 508A, panels .

We have over 2000 parts and consumables in inventory and ready to ship!

Standard Features

- Blend valve
- FDA 510k System
- Boost Pump
- Enclosed UL 508A Panels
- Sediment and Carbon Filters
- Softener
