

BETTER WATER, INC[®]

MEDIPAC RO SYSTEM - MEDICAL DEVICE

MediPac RO System

The MediPAC water treatment system is pre-engineered and pre-assembled water system designed with easy installation and versatility in mind. The MediPAC comes on casters and is entirely self-contained. The unit is pre-plumbed. The only necessary plumbing needed for installation is a hot and cold water supply, loop feed and return, plumbed reservoir and to connect the system drain. The wiring is also completed at the factory, all that is required to hook-up the electrical part of the system is to simply plug the accompanying 115 vac power cord into the specified receptacles. A remote alarm box is included with the system.

The MediPac System carries a 510k certificate from the FDA and is designed to meet or exceed AAMI RD: 62 on RO quality water for dialysis. Each unit is individually tested prior to shipping.

Standard Features

- Tap water boost pump and control (if needed)
- Blend valve complete with temperature gauge and cold water by-pass
- 0-100 PSI pressure gauges pre and post every piece of equipment
- Automatic back washing carbon filters
- Automatic regenerating water softener (if needed)
- Pre-R.O. 5 micron filtration
- Interlock circuit with indicator lights for the automatic back washing equipment
- Tank feed systems include FDA grade polyethylene or polypropylene R.O. water storage tank, complete with air filter, low level alarm and controls
- Repressurization pump with control box and flow switch (if needed)
